

PROACTIVE VIDEO MONITORING AND DETECTION

Blue Eye

Introduction

Blue Eye is a video surveillance monitoring service provider that offers businesses state-of-the-art security solutions. These solutions utilize advanced AI and machine learning algorithms to analyze video feeds from security cameras in real time, helping businesses prevent theft, vandalism, and other security threats. Additionally, Blue Eye provides clients with an easy-to-use dashboard where they can view incidents, BOLOs, and other events. Blue Eye aims to provide businesses with comprehensive security solutions to improve their safety and security.

Benefits of the Integration

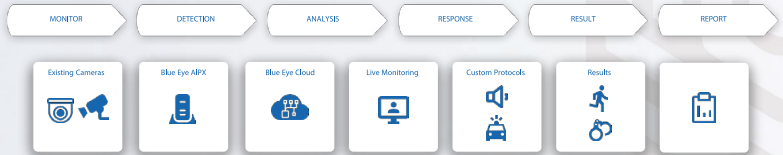

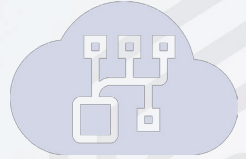

- Proactive Crime Deterrence
- Cost-effective and Holistic Security
- Customized Security Solutions
- Innovative Technology-Driven Surveillance
- 2-Way Audio
- Real-Time Response and Dispatch
- Camera Agnostic
- Intelligent Platform
- Customized Security Protocols
- Versatile and Adaptive Monitoring
- Partner-Friendly, Attractive Revenue Share Model

SECURITY AS A SERVICE

How it works:

Whether you're implementing or expanding your security system, Blue Eye works directly with your team to ensure optimal coverage at minimal cost.

When a threat is detected, our solution analyzes the situation and routes threats to our live monitoring team for dispatch and response based on defined protocols.

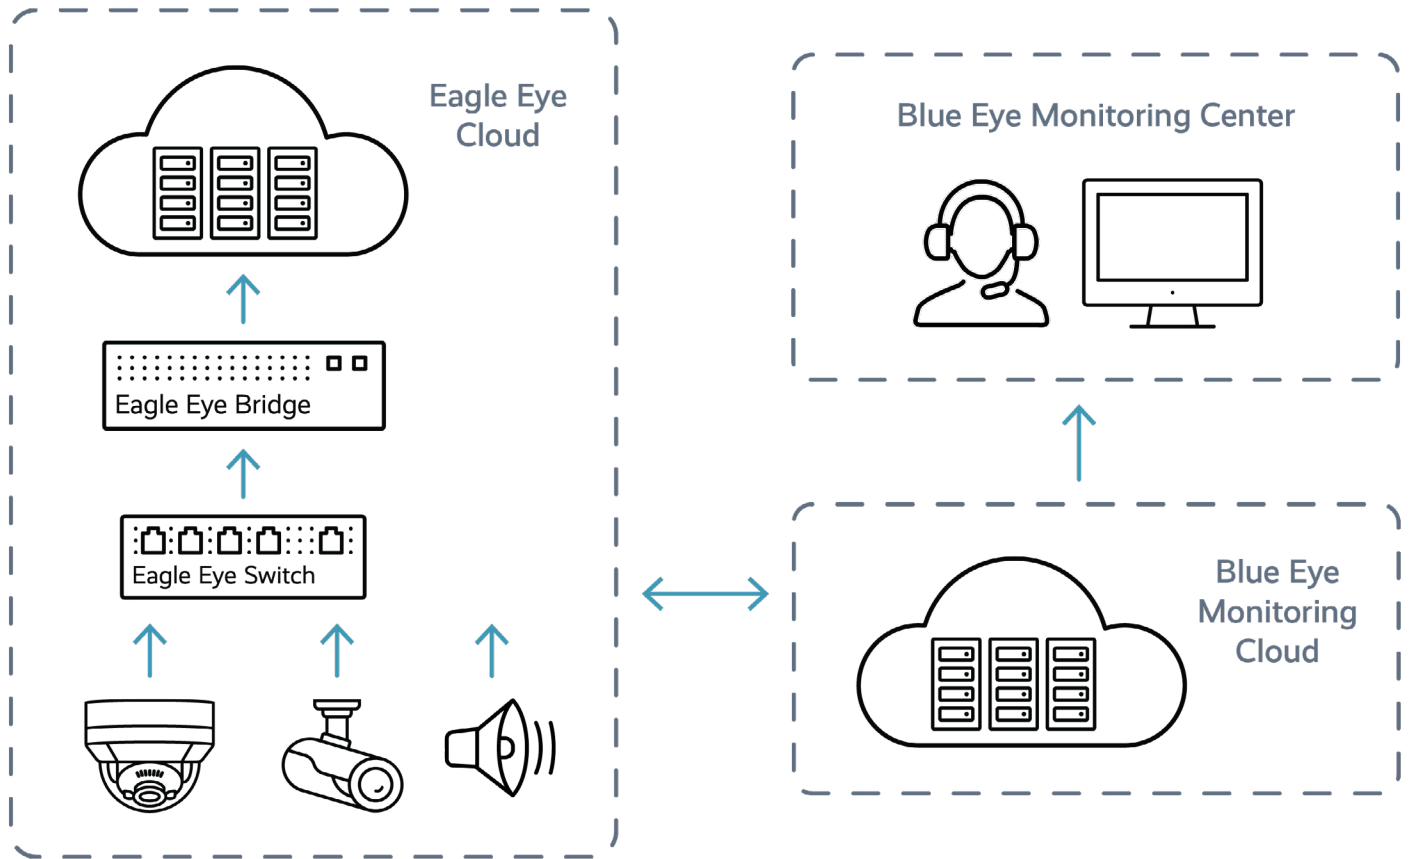

Solution

Blue Eye's monitoring platform, in combination with their AI and human operators, leverages Eagle Eye Networks' cloud to provide customers with a superior monitoring experience.

By combining the speed, accuracy, and scalability of AI with the critical thinking, judgment, and decision-making of human operators, Blue Eye can provide a monitoring experience that is faster, more accurate, and more reliable than either approach alone. Customers can benefit from real-time monitoring and alerts, as well as the peace of mind that comes from knowing that their security and safety are being monitored by a team of experts who can respond quickly and effectively to any situation.

Blue Eye provides peace of mind with adaptive, real-time security solutions through innovative technology and personalized service to safeguard evolving business needs. The integration with Eagle Eye is as easy as a cloud connection, with no additional equipment needed.
