

STANDARD, PROFESSIONAL, ENTERPRISE

Eagle Eye Cloud VMS Editions Data Sheet

Choose from three Editions to suit your organization's size and needs

Editions features include:

- **Single sign-on**
Streamline access management and secure login credentials for all system access.
- **Locations/Floor Plans**
Manage groups of cameras by location or view them on a floor plan for visual reference.
- **Audit Log**
Review and track user activity. Ensure compliance and proper system use.
- **Smart Layouts**
Prioritize cameras with activity to the top of the dashboard layout using AI to detect motion.
- **Command Line Interface (CLI)**
Create scripted commands to automate scaled or system-wide functions.

Solutions to match business needs

Large, multisite, and enterprise organizations need additional solutions to safeguard, manage and run their business. Eagle Eye Networks has over ten years experience of working with organizations of all sizes and understands the tools needed for businesses at scale. Eagle Eye Editions (Standard, Professional, and Enterprise packages) remove the guesswork in identifying your optimal VMS (video management system) solution with turnkey sets of advanced features to best serve our customers. The Professional and Enterprise Editions build on the powerful foundation of the Standard Edition to provide additional AI capabilities and hyper targeted management tools needed to optimize systems for larger businesses.

Standard Edition

The Standard Edition comes with the Eagle Eye Cloud VMS subscription and includes all the core capabilities of the Eagle Eye Networks Cloud VMS—including the award-winning Smart Video Search. This package meets the needs of the majority of businesses that value an easy-to-use, cost-effective cloud surveillance solution.

Professional Edition

The Professional Edition is intended for organizations with 10 to 25 locations. Professional includes added features to better manage large quantities of locations, users, and cameras.

Enterprise Edition

For large, distributed, and multinational businesses, the Enterprise Edition supports unlimited users and provides a sophisticated access management solution plus advanced operational reporting to meet audit and regulatory requirements.

Select the right Edition for your business security needs:
