

CLOUD VIDEO SURVEILLANCE

K-12 School Solution

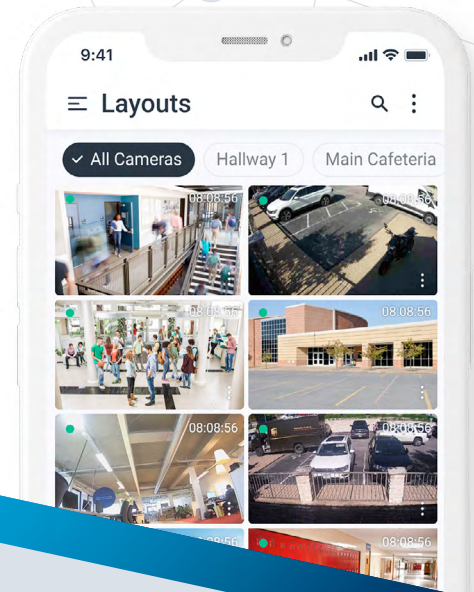

Centralized Cloud Video Surveillance for K-12 Schools

Schools often need to do a lot with a little, operating under budgetary constraints and with limited staff. When it comes to security, an easy-to-install system that even non-technical staff can learn to use makes all the difference.

Our best-in-class video management system (VMS) makes it easy to work with your existing cameras so you can save big on infrastructure. Cutting-edge technology and easy-to-use software accessible from anywhere ensure your students' safety and streamline your operations. AI-powered functionality, the first-of-its-kind Eagle Eye 911 Camera Sharing feature, and other must-have features are available at your fingertips. Eagle Eye Networks helps you protect your students and staff and free up your precious resources to focus on education.

Create a safer learning environment for students and staff.

- Share selected cameras automatically with emergency call centers should a true crisis arise.
- Get valuable operational insights from advanced AI analytics.
- Work with the cameras you already have in place.
- Securely view footage from multiple cameras on your smartphone, tablet, or laptop.
- Set up your security system and train staff quickly and easily.

911 Camera Sharing

In a crisis, seconds matter. Now you can provide real-time situational awareness during 911 calls, with a direct camera link to an emergency communication center (ECC). You designate the specific cameras that you want to connect with telecommunicators — but if the unthinkable happens, a direct visual link to 911 telecommunicators can help keep first responders prepared with the information they need.

Smart Video Search

Save time and immediately find the video clips you need. Search your footage using natural language, the same way you search the web to find specific people, vehicles, or objects.

Have a report of suspicious activity from a student in a red sweatshirt with a backpack? Immediately identify all instances captured on surveillance. Concerned about a blue Ford sedan? See when the vehicle was on campus.
